HIPAA Privacy Regulations As of April 14, 2003

HIPAA Privacy Regulations As of April 14, 2003 Patient privacy has always been a top priority at Atlanta Women's Obstetrics & Gynecology, PC. All our staff – from our physicians to our payroll specialist – are dedicated to protecting our patients' privacy. The new HIPAA privacy regulations provide medical practices and patients with an additional means to help guarantee that patient privacy is a top priority for all providers – physicians, hospitals and pharmacies – throughout the United States.

The new rules are beneficial for patients because they strengthen and set national standards for the privacy of your medical information. They guarantee strong privacy rights to patients and families in a way that puts common sense ahead of bureaucracy. Specifically, the rules give patients more control over who can see their private medical information.

As an organization dedicated to safeguarding patients' medical records, we want patients to fully understand their medical privacy rights and know how their medical information is used. However, our number one job is to care for our patients – nothing should interfere with that. The final HIPAA Privacy Rule finds the right balance. It protects patient information but allows all essential activities to go on, which benefits all of us.

Make no mistake; the new rules have required sweeping operational changes. They touch every employee, physician and contractor of our medical practice. Nonetheless, they are the right thing to do, and Atlanta Women's Obstetrics & Gynecology, PC is committed to making them work for our patients, their families and our staff.

The enclosed Notice of Privacy Practices outlines specific details regarding HIPAA and your protected health information. In accordance with the federal HIPAA guidelines we ask that you sign a receipt of acknowledgement for the Notice of Privacy Practices. After reviewing the Notice of Privacy Practices, please let us know if you have any questions regarding HIPAA we can answer for you.
